

RESOURCES – conservation organizations

Help ensure that Northern Virginia will continue to support over 70 species of dragonflies! Something as small as adding a rain barrel or creating a native plant garden, or as big as participating in watershed planning and preserving new parkland – *whatever* size your contribution may be, as a resident of Northern Virginia you can participate in many forms of active and meaningful conservation.

Let one of these dedicated and knowledgeable organizations get you started!

Local:

Audubon Society of Northern Virginia – ASNV has one of the most comprehensive lists of conservation organizations (as well as doing great work themselves), including info on:

Native Plants

Eco-friendly Lawn Care

Habitat Restoration

Stream and Watershed Conservation

Pollinator Conservation

Check out their website for a *great* list of conservation links -
